Digimarc Corporation, ("Digimarc") is the owner of the entire interest in the above-identified application. The assignment was recorded on October 16, 1997, (Reel 8856, Frame 0664-0666).

Digimarc hereby disclaims the terminal part of any patent granted on the above-identified application ("the Subject Patent"), which would extend beyond the expiration date of the full statutory term of United States Patent No(s). 6,404,898, 6,542,618 or 6,026,193 ("the Prior Patents"), and hereby agrees that the Subject Patent shall be enforceable only for and during such period that the legal title to the Subject Patent shall be the same as the legal title to the Prior Patents, this agreement to run with the Subject Patent and to be binding upon the grantor, its successors or assigns.

Digimarc does not disclaim any terminal part of the Subject Patent extending beyond the expiration date of the full statutory term of the Prior Patents, in the event that such later expiration of the Subject Patent arises because one or more of the Prior Patents lapses for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under 37 CFR §1.321(a), has all claims cancelled by a reexamination certificate, or is otherwise terminated prior to expiration of its statutory term, except for the separation of legal title stated above.

I am empowered to act on behalf of Digimarc.

Documentary evidence of a chain of title showing present ownership of the Subject Patent and the Prior Patents has been reviewed, and I hereby certify that, to the best of my knowledge and belief, such title is in Assignee.

I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
